👤 About Me

My name is Revanth, and my journey through life so far has been filled with a mix of challenges, personal growth, and a relentless pursuit of becoming the best version of myself. I come from a humble background and have experienced struggles in almost every phase of my life—not just during childhood, but continuing into adulthood. From battling health complications in my early years, spending countless days in hospitals, to overcoming emotional turbulence and academic pressure, life hasn't always been easy. But with the support of my loving family, I've emerged stronger and more grateful for every moment I've lived. Some of my happiest childhood memories revolve around summer vacations spent at my grandmother's house, which served as a sanctuary away from pain and hardship.

👪 Family Background

I am fortunate to have a deeply supportive and close-knit family. My father, Mr. Pandy, is a dedicated bus driver working for TNSTC for over 25 years. His kindness, humility, and unwavering sense of responsibility have been an inspiration to me. He has always influenced me to make the right choices in life and taught me the value of treating everyone with respect. My mother, Mrs. Suriyakala, is a warm and friendly homemaker. Her emotional support has been a pillar in my life, especially during difficult times. I also have a younger brother, Gokul Prasath, who completed his B.Com and has successfully cleared the CA Foundation exam. He is currently preparing for the CA Intermediate exam. Our home is a space of encouragement and freedom, where every decision—whether personal or professional—is met with trust and backing.

🜍 Core Values and Beliefs

One of the most deeply held beliefs I carry is that kindness and gratitude should never require a reason. I believe in treating people with warmth and compassion regardless of their background or the situation. My father's influence shaped much of this mindset, and I strive to mirror his approach in my life. Even when life felt overwhelming, I held onto this value. I still believe in being kind, even if the world isn't always kind back. Another value I cherish is hard work. While many attribute success to luck, I believe in effort. Luck may open doors, but it is hard work and persistence that determine whether you can walk through them.

📊 Education Journey

My schooling journey spanned across three schools. From LKG to 7th standard, I studied at Rangarao Matriculation School, a modest school near my village. Though simple, it gave me my foundational knowledge and early memories. From 8th to 10th standard, I studied at Linga Global School. That phase exposed me to the broader realities of life. It was there I encountered both wonderful and regretful experiences, making mistakes that still linger in my memory. For my higher secondary education, I moved to Coimbatore and studied at SVGV

Matriculation School. Coming from a village, the shift to city life introduced me to people with diverse lifestyles and perspectives.

Later, I pursued my M.Tech in Computer Science and Engineering through an integrated course at Sri Krishna College of Engineering and Technology. The first two years were during the pandemic, and we had online classes. I barely made friends during that time, as much of my focus was wrapped up in my relationship. Unfortunately, after the third year, a breakup left me emotionally shattered. I couldn't enjoy college life as much as I should have. Still, I managed to form a small yet meaningful circle of friends and tried to make the best of my final years in college.

💻 Technical Skills and Passion

I began my tech journey with a strong interest in web development and Java programming, which remain some of my core strengths. However, over time, my interests have shifted toward the world of artificial intelligence. I find the potential of AI both fascinating and powerful. I am passionate about applying this technology to real-world problems and am continuously exploring new tools and concepts in the field.

🚀 Projects I'm Proud Of

I've worked on several projects, each of which has contributed to my learning and sense of accomplishment:

1. **Sentiment Analysis of Customer Reviews** – Using RNN and LSTM, this project visualizes customer sentiment with graphical output. It taught me how deep learning can interpret natural language.
2. **Decentralized House Selling & Buying Platform** – Built using Hardhat.js and escrow smart contracts to ensure secure transactions in a blockchain-based environment.
3. **MRI Brain Tumor Detection** – A CNN-based system that detects tumors from MRI scans with 85% accuracy. This project aimed to contribute to medical imaging support.
4. **Financial Fraud Detection** – By leveraging LLaMA2 and Neo4j, this system detects fraud using the combined power of LLMs and graph databases, achieving an accuracy of 90%.

Each of these projects pushed my technical boundaries and brought a sense of fulfillment that only building something from scratch can offer.

🎓 Personality and Interests

If I had to describe myself in three words, they would be: **grateful**, **loyal**, and **relentless**. I believe in being emotionally available to people I care about, and I value loyalty above everything else. My circle of friends is small, but each one holds a special place in my life. I enjoy music—especially love failure songs—watching crime thrillers, and playing chess. Recently, my social media usage has reduced, and my time now goes into listening to podcasts and honing my chess skills.

👥 Friendships & Bonds

I treasure friendships deeply.

- **Divya Dharshini (Poona)** – My one and only female best friend. We've known each other for over 10 years. She has been my emotional anchor, especially during my lowest points after my breakup.
- **Shiva Prasath** – My only true friend until the 10th standard, and my crime partner during school.
- **Higher Secondary Friends** –
    - **Mark Roshan**: My closest and first friend in Coimbatore. He's a constant well-wisher.
    - **Naveed Ahmed**: Now an architect, he's a kind and genuine soul.
- **College Friends** –
    - **Ananth**: My first college friend, one of the nicest people I've met.
    - **Vasanthakumar**: My roommate and tea-time partner; we have countless memories together.
    - **Manoharan**: A respectable person with a business mindset.
    - **Muralidaran**: A straight shooter and someone I always felt comfortable around.
    - **Pradeep**: My drinking buddy and another straight talker.
    - **Deva Sahitiyan**: Annoying, stubborn, yet somehow loveable.

💔 Past Relationship

My past relationship with **Harini Jeya Shree** lasted from **June 5, 2019 to October 30, 2023**. What began as love turned into a period of emotional chaos. The breakup affected me deeply and made me question many things about myself. However, it also taught me invaluable lessons—about boundaries, self-worth, and healing. It was a dark chapter, but one I've learned to accept and grow from.

🌍 Dreams and Philosophy

Happiness, to me, is the ultimate goal. I believe life is short and we should experience everything fully. I want to be in a place surrounded by people who are happy, non-judgmental, and willing to truly listen. It's not about job titles, salary packages, or the

reputation of a company—it's about opportunities to learn and grow. I don't place my faith in luck. While some may seem lucky, I've learned that it's consistent hard work that wins in the long run.
